

**everest**  
8848

**Normal Lamination**

**solex (7 years warranty)**

**AS 2047**

**everest 8848** is a 3 chambered double seal, 54mm wide with a wall thickness of 2,5mm. The system is designed to have a 3 degree incline towards the outside for a better water drainage. This systems decorative glazing beads gives it that esthetic look. Grey TPE gasket technology also gives the systems that smooth elegant feeling.

**Advantages of TPE Gasket:**

- ▶ TPE gasket does not stain the profile at the closing edges.
- ▶ Pre inserted gasket on all profiles makes fabrication of windows & doors faster than ever.
- ▶ TPE gasket is weld able thus giving that perfect seal on all corners.
- ▶ The structure and position of the chamber infill gives this system its perfect insulation value of 1.66W/m2K.
- ▶ 100% Recyclable.
