

Decorative Louver  
Shutter Systems

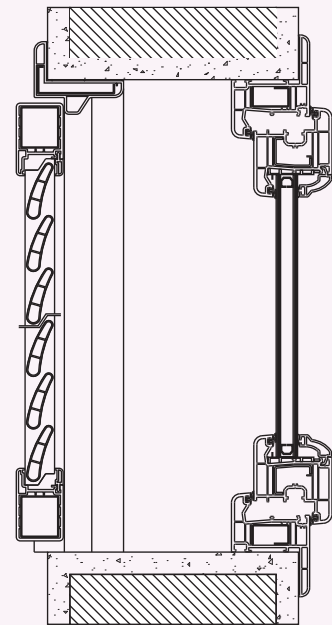

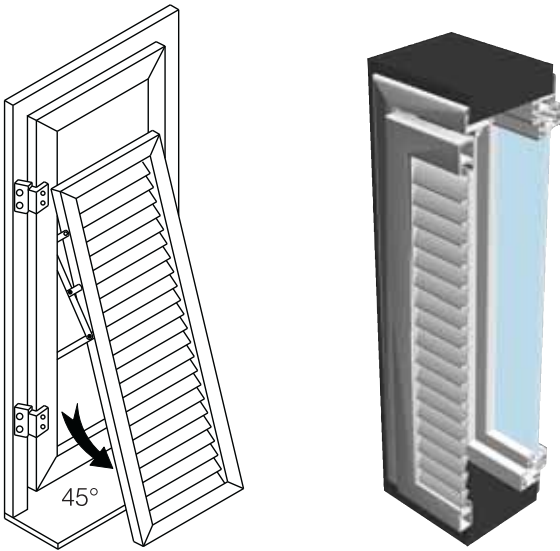

# Decorative Louver Shutter Systems

The louver shutter system is an indispensable element of our architectural culture and now comes to life again with Deceuninck. The louver shutters protect the buildings from bad weather conditions and the effects of sun and provide practical use advantages with different and aesthetic accessories.

The louver shutters manufactured may be assembled on the frame of the window or on the wall. It is separated into three groups of single sash, double sash and the folding sash in accordance with their way of assembly.

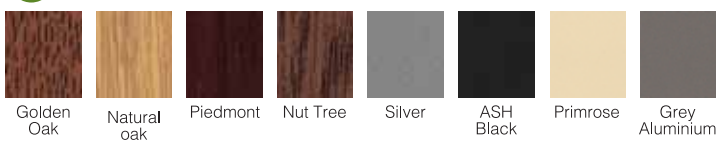

Deceuninck louver shutter system is well-adjusted to all windows and may be used safely for years.

## Normal Lamination

## Solex (7 years warranty)

Environment-friendly Ca-Zn stabilizer is used in the production of PVC profiles.
